DETAILED ACTION

1. Claims 1 – 14 are presented for examination.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 9 – 12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim limitations teach a software module and does not have language stating that the software module is embodied on any hardware for causing a piece that hardware to perform the claimed functions.

4. Similarly, computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical “things.” They are neither computer components nor statutory processes, as they are not “acts” being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program’s functionality to be realized, (i.e., MPEP 2106.01).

Allowable Subject Matter

5. Claims 1 – 8, 13 and 14 are allowed.

Response to Arguments

Art Unit: 2143

6. Applicant's arguments with respect to claims 9 – 12 have been considered but are moot in view of the new ground(s) of rejection.
